

OUR NEX GENERATION С Е W 0 R Κ S Ρ А +1.2% 1 WORKFLOW +**SOLUTION**

A powerful platform in a transforming investment banking industry, which is faced with ongoing cost and productivity challenges across the business. There is a growing demand to efficiently incorporate best-inclass content and technology. Our solid market credentials are built on a 40,000-strong data platform user base, that has provided the valuable insight to deliver our step-change solution.

With our well-established expertise in this space, we've already delivered industry-leading content and analysis tools for the deal making community. We've delivered company- and sector-level intelligence to efficiently uncover new investment ideas, structure deals, pitch development and value companies.

Easily construct due diligence valuation models and conduct market research on companies under consideration. Screen and scan global equity and debt news issues and M&A data on peers. Access over 30 million investment research reports by 1,900 contributors, including some of the most sought-after analysts. Our platforms are connected to global exchanges, featuring exclusive news from Reuters and insights from IFR[®].

New highlights:

- Faster and lighter Using the latest Web browser technology gives a significantly lighter install that reduces deployment time and cost
- Intuitive navigation Familiar browser paradigm and navigation menus to access the most relevant tools
- Adaptive and Al-based More powerful structured and natural language search driven by machine learning
- Wealth of best-in-class content, news and research
- Open and agile API The Side by Side Integration API dynamically connects Refinitiv with your proprietary or third-party sources, creating a single connected workflow across all applications

Refinitiv workspace helps you make faster and more accurate decisions, to better advise your clients.

Four collaboration tools to give an easier and faster experience

Highly customized

Every user will have an individual home page, which can be customized to contain regularly used core search and analysis tools. You will see this page first when you log in.
